Accounting

Textbook

Understanding Financial Reporting Standards

A Non-Technical Guide

by **Roger Hussey** (*University of Windsor, Canada & University of the West of England, UK*), **Audra Ong** (*University of Windsor, Canada*)

- Expands business students' knowledge by explaining, in non-technical language, the accounting regulations that determine the accounting records and financial reports required of companies
- Covers topical issues and increasingly important areas such as sustainability reporting and corporate governance
- Adopts a unique approach through non-technical explanation of financial reporting standards

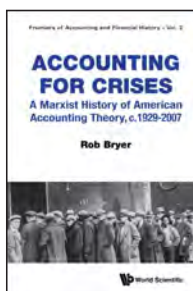

Readership: Business and accounting undergraduates, postgraduates and researchers.

Accounting for Crises

A Marxist History of American Accounting Theory, c.1929 – 2007

by **Rob Bryer** (*Warwick Business School, UK*)

"A tour de force: Engaging seriously with Marx's actual crisis theory – rather than potted versions – and marshalling the author's deep knowledge of accounting and its history, Accounting for Crises, explain why the United States was the epicentre of both the Great Depression and the Great Recession. The interplay of the tendential fall in the rate of profit, 'moral hazard' and 'swindling' is central to Rob Bryer's explanation, as is the role of accounting theory. The first three factors were stressed also by Marx; the last is Bryer's original contribution."

Andrew Kliman, Pace University

Climate Change Economics / Climate Change Policy

How to Cope with Climate Change

by **Michael Krause**

Climate change is the ultimate threat in the world today, and it can only be addressed through comprehensive technological and societal transformation. This book examines the financial, technical, and social situation of the world today, and outlines some of the existing policies and technologies that will help us on our long and unpredictable journey through climate change. Three major factors that have led us to today's predicament – our economic system, our own inexcusable ignorance, and continued political inertia – must be addressed, discussed, and changed for the better.

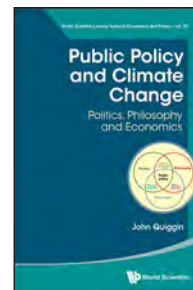

Readership: General public, undergraduate and graduate students interested in climate change, green technologies and societal and behavioral change.

World Scientific Lecture Notes in Economics and Policy - Vol 20

Public Policy and Climate Change

Politics, Philosophy and Economics by **John Quiggin** (*University of Queensland, Australia*)

The main focus is on the critical economic concept of opportunity cost: The true cost of anything is what you must give up to get it. In a smoothly functioning market, prices determine, and are determined by, opportunity costs. But markets for the emissions that generate global heating do not operate smoothly, if they exist at all. This book explains how policy responses such as carbon taxes and emissions trading markets are products of these 'market failures'.

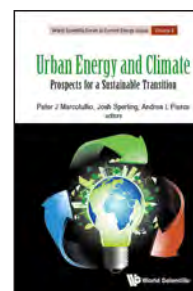

Readership: Undergraduates studying Politics, Philosophy and Economics (PPE).

Urban Energy and Climate

Prospects for a Sustainable Transition

edited by **Peter J Marcotullio** (*City University of New York, USA*), **Josh Sperling** (*National Renewable Energy Laboratory, USA*) & **Andrea L Pierce** (*University of Delaware, USA*)

This edited volume brings together leading experts on the prospects and challenges of urban energy innovation and on related-economic, social and environmental sustainability transitions. The focus of the volume is on multidisciplinary reviews, research informing technologies and policies for sustainability, and analytical insights addressing rapid urbanization and changes across a diverse typology of global cities.

Readership: Professionals, researchers and informed readers interested in understanding urban energy prospects for a sustainable, resilient future.

Towards a Sustainable Arctic

International Security, Climate Change and Green Shipping

edited by **Michael Goodsite** (*University of Adelaide, Australia*), **Niklas Swanström** (*Institute for Security and Development Policy, Sweden*)

The Arctic's environment, economics and politics are changing rapidly, and the conflicting interests among stakeholders mean that it lacks sustainable political and military cooperation. This book provides a snapshot of the subject areas connecting transport, environmental security, resource development, and military security, featuring new material written after Russia's second invasion of Ukraine.

Readership: Arctic scholars and scholars of regional security and climate change global policy. Also useful for Asian scholars interested in the Arctic.

Climate-Smart Innovation

Social Entrepreneurship and Sustainable Development in the Environmental Economy

edited by **Elena G Popkova** (*MGIMO University, Russia*), **Natalia G Vovchenko** & **Olga V Andreeva** (*Rostov State University of Economics, Russia*)

This book studies smart green innovation through the prism of social entrepreneurship as a driver for sustainable development and the development of an environmental economy. It systematizes and analyzes the modern challenges of the environmental economy: climate change and environmental pollution.

Readership: The primary market of this book is scholars who study the environmental economy, sustainable development, and social entrepreneurship.

Valuation and Financial Forecasting

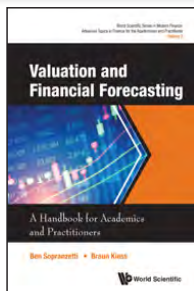

A Handbook for Academics and Practitioners

by **Ben Sopranzetti, Braun Kiess** (*Rutgers Business School at Newark and New Brunswick, USA*)

Valuation and Financial Forecasting is a clearly written and easy to understand handbook intended to help readers of all skill levels accurately forecast financial statements, analyze capital investments, and value business enterprises. The book's approach transcends the traditional textbook discussion of business valuation by providing readers with deep insights into the nexus between financial forecasting and business valuation.

Readership: Students, industry professionals, general public, owners of small businesses.

Textbook

Managing Infrastructure Projects

(2nd Edition)

by **Willie Tan** (*National University of Singapore, Singapore*)

- Unlike most books on project management that focuses on the construction phase, this book covers the entire infrastructure development cycle
- Covers the management of infrastructure development, rather than just project finance
- Balanced treatment of pre-tender and post-tender stages of infrastructure development

Readership: MSc students, researchers, public officials, project sponsors, contractors, consultants, and infrastructure professionals.

Market Power, Economic Efficiency, and the Lerner Index

edited by **Rolf Färe, Shawna Grosskopf** (*Oregon State University, USA*) & **Dimitris Margaritis** (*University of Auckland Business School, New Zealand*)

The book uses distance functions, a generalization of the more familiar production function, as the theoretical and empirical tools to construct Lerner indexes of market power in both the input and output markets. The use of distance functions enables us to explicitly account for the effects of firm inefficiency and price markups in the evaluation of market power. The book focusses on the theory and provides a menu of applications to construct measures of firm efficiency and market power in the financial and public sectors.

Readership: Advanced undergraduate and graduate students, researchers and practitioners in the fields of production and industrial economics.

148pp	Apr 2024	
978-981-128-592-9	US\$78	£70

Textbook

Global Corporate Finance

A Focused Approach (4th Edition)

by **Suk H Kim** (*University of Detroit Mercy, USA*)

"... offers a comprehensive overview of the principles, practices, and challenges in international finance. The book provides a solid foundation for both undergraduate and graduate students in the field. The book includes an opening and closing case in each chapter, which masterfully ties theory to practice."

Hong Qian, Oakland University

Readership: For undergraduate and graduate students in business schools, as well as managers and practitioners who want to learn more about global finance.

Behavioral Finance

Beyond the Basics

edited by **Itzhak Venezia** (*Academic College of Tel-Aviv-Yaffo, Israel*), **Rachel Calipha** (*Academic College of Tel-Aviv-Yaffo, Israel*)

- *Behavioral Finance: Beyond The Basics* covers many innovative topics and presenting original findings on a wide range of subjects, all in one venue, make the book ideal as a reference book for researchers interested in keeping up with the important developments in behavioral finance
- This book is distinct in its malleable educational usability. On the one hand, it provides a text for finance academics and professionals to refer to in adapting traditional techniques to industries and organizations that were hitherto under-represented in the behavioral finance literature. On the other, it could also be used as an educational guide for entrepreneurially inclined academic and industry professionals

Working Capital Management

Concepts and Strategies

edited by **H Kent Baker** (*American University, USA*), **Greg Filbeck** (*Penn State Behrend, USA*) & **Tom Barkley** (*Syracuse University, USA*)

This book provides an objective look into the dynamic world of Working capital management (WCM). Its coverage extends from discussing basic concepts and their applications to increasingly complex and real-world situations. The book stresses that WCM is a combination of both art and science. This volume spans the gamut from theoretical to practical while offering the right balance of detailed and user-friendly coverage. Readers can gain an in-depth understanding of this subject from experts in this field.

Readership: Academics, researchers, and practitioners in corporate finance.

Institutions, Goals, Policies and Analytics in Economic Development

by **Solomon I Cohen** (*Erasmus University Rotterdam, The Netherlands*)

The field of Development Economics (DE) has overstretched over time with risks of becoming shallow. There is a need for the compartmentalization of DE that focuses on simplification, oversight, productivity and relevance. This volume is a handbook in development economics with a compartmentalized perspective. It makes use of case study applications, both recent and over the last few decades. Next to 2 introductory chapters that elaborate on the development regions, the book falls in five parts.

Readership: Academics/researchers, consultants/experts, government professionals, post graduate students, university/faculty libraries, International agencies.

Environmental / Resources / Energy Economics

Handbook of Environmental and Green Finance

Toward a Sustainable Future

edited by **Sabri Boubaker** (*EM Normandie Business School, France*), **Thai-Ha Le** (*VinFuture Foundation, Vietnam*)

This handbook contains conceptual, empirical, and policy papers that provide an insightful and timely read for researchers, investors, and policymakers interested in sustainable finance, development finance, and alternative finance to combat climate change. Throughout this book, readers are offered a global analysis of the current state of the sustainable finance sector and provided with potential solutions to address obstacles in this field.

Readership: Academic libraries, students (undergraduate, graduate, and post-graduate), and practitioners and policymakers.

Agrobiotechnology in Perspectives

History, Economy, Science and Technology on the Plate
edited by **Hon-Ming Lam** (*The Chinese University of Hong Kong, Hong Kong*)

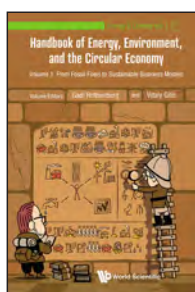

This edited review volume documents selected agrobiotechnology talks of the series in 13 chapters, bringing together the knowledge and expert insights of agrobiotechnology by international and local speakers with diverse expertise. It covers a wide range of topics from food chemistry and nutrition, seed trade and quality assurance, plant breeding, agricultural product marketing, crop genomics, soybean culture and history, plant laws, agribusiness, sustainability, chemical pollution, to food security.

Readership: Undergraduates, graduates, researchers in agrobiotechnology and agricultural sciences, and agricultural industry practitioners.

Textbook

Metals and Energy Finance

Interrelationship between Technical and Financial Risk in Mineral Projects
(3rd Edition)
by **Dennis L Buchanan** (*Imperial College London, UK*)

This revised edition retains sections on both conventional and financial engineering treated in a quantitative manner with fresh case studies. New sections address softer issues around environmental impact and social licence from a qualitative perspective, albeit acknowledging that without these approvals a mining licence will not be issued.

Readership: This book is intended for professionals and graduate students in the fields of mineral and petroleum economics and business management.

Economics of Environment, Climate Change, and Wine

Selected Papers of Robert N Stavins, Volume 3
(2011 – 2023)
by **Robert N Stavins** (*Harvard University, USA*)

Robert N Stavins has been one of the most influential voices in environmental economics and policy over the past three decades. Written by Stavins and his co-authors, the selected articles and essays in this book were originally published in a diverse set of leading, scholarly periodicals. They are collected here for the first time.

Readership: Undergraduate and graduate students in the field of environmental and climate change economics. Academic economists. Practitioners of environmental economics.

Advances in Entrepreneurial Economics and Sustainable Development - Vol 3

Sustainable Development of the Green Entrepreneurial Economy

edited by **Elena Popkova** (*RUDN University, Russia*), **Elena N Makarenko**, **Natalia G Vovchenko** & **Olga V Andreeva** (*Rostov State University of Economics, Russia*)

This book introduces a new category into the scientific turnover: green entrepreneurial economy. It is treated as an economy of environmental transformations of the business environment in support of sustainable development. The key subject of the green entrepreneurial economy is environmentally responsible business, which implements Sustainable Development Goals (SDGs) in its economic practice.

Readership: Scholars (both graduates and undergraduates), academics who study entrepreneurial economy; entrepreneurs and policy makers who support the Sustainable Development Goals.

Solar Power Finance Without the Jargon

(2nd Edition)
by **Jenny Chase** (*BloombergNEF, Switzerland*)

“Indispensable reading for clean energy pros and industry newcomers alike... With the book’s second edition, Chase rightfully incorporates the impact of geopolitical conflicts, like Russia’s invasion of Ukraine, on the energy transition, while also highlighting innovation in tangential sectors, like battery storage, hydrogen, and more. I can’t recommend this book enough.”

John Engel
Editor-in-Chief of Renewable Energy World & POWERGRID International

The Next Industrial Revolution

A New Age for Innovation in Industry
 by **Vincent Petit** (*Schneider Electric, Hong Kong*)

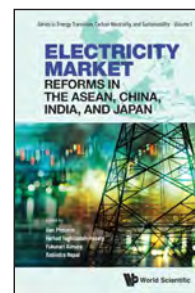

In *The Next Industrial Revolution*, Vincent Petit builds on his earlier work, *The Age of Fire Is Over* (2021), where he explored how key transformations in consumption patterns impact our energy system in ways that have been seldom envisioned. He further develops this work here, and traces how these transformations apply to our modern industrial system, the bedrock of our global economic development and wealth creation.

Readership: Academia: professors and graduate students in Environmental Science, Public Policy, Industrial Ecology, Engineering. Business: CXOs, Strategy leaders.

Global Web3 Eco Innovation

by **DeFiDAO, David Kuo Chuen Lee, Chong Guan & Ding Ding** (*Singapore University of Social Sciences, Singapore*)

This book introduces the origin of the Web3 concept, before looking into the infrastructure of Web3, namely the blockchain and its main applications — the development of which started from the genesis block of BTC to date. The book also covers the key developing tracks of the current Web3 world, including DeFi, NFT, GameFi, DAO and Metaverse. A review of the “twins” of Web3 — investors and regulators — in the regulation of this field wraps up the discussion.

Readership: Advanced undergraduate and graduate students, researchers and practitioners in the fields of finance, financial technology, business management and innovation.

Laws: Rigidity and Dynamics

edited by **Eliezer Rabinovici** (*The Hebrew University of Jerusalem, Israel*)

Laws: are they a human invention or are they independent and indifferent to our existence? Are they there to be discovered, dictated, and enforced? Are they absolute and rigid, or do they evolve? Are they applicable in some cases and irrelevant in others? A group of multidisciplinary fellows and world-leading mentors from all habitable continents met to share and challenge their opinions on the subject. The results of their deliberations are to be found in the chapters of this book.

Readership: Researchers in natural and physical science, social and political science.

World Scientific Lecture Notes in Economics and Policy - Vol 21

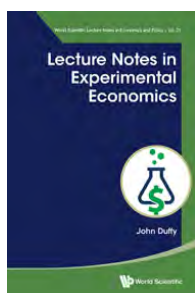

Lecture Notes in Experimental Economics

by **John Duffy** (*University of California, Irvine, USA*)

Experimental economics involves the use of controlled, experimental methods both in the laboratory and the field to better comprehend how individuals and groups make economic decisions and to more clearly identify causal relationships. This book takes the reader to the frontier of research in this exciting and rapidly growing field. Unlike other texts, this book discusses both the methodology of experimental economics and some of the main application areas.

Readership: Professors, researchers, graduates, undergraduate students of economics, business management and finance.

The Nature of Economics

Smith, Coase, and the Substitution Structure of Production

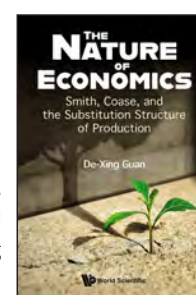

by **De-Xing Guan** (*National Taipei University, Taiwan*)

This book conveys a simple idea: that the economic framework established by Smith and Coase is very useful in describing and explaining many facts in the real world.

This framework will be repeatedly used in this book to explain various economic problems such as the law of demand, growth and development, monetary theory and policy, among others.

Readership: Undergraduate and graduate students, as well as researchers, especially in the department of economics, business school, and law school.

Theory, Practice, and Evaluation
by **Jianzhi Zhao** (*Fudan University, China*)

Translated by: **Qin Lin** (*Shanghai Normal University, China*)

This book studies the theory, practice and evaluation methods of international development cooperation, aid and assistance management in detail from a global perspective.

It attempts to answer the following questions: How effective are the current Western aid methods? How should China optimize current international development cooperation? How to effectively design an aid management system in the international community? How to assess the effectiveness of aid?

Readership: Academics, policymakers, professionals, undergraduate and graduate students interested in economics and developmental economics, international development cooperation, aid management system.

11 Smart Cities

by **Belinda Yuen, Yanjun Cai, Francine Chan, Xin Yang & Kelly Lim** (*Singapore University of Technology and Design (SUTD), Singapore*)

This book discusses smart city implementation in 11 smart cities — Auckland, Boston, Copenhagen, Gothenburg, Guangzhou, Hangzhou, Melbourne, Milan, Seoul, Tokyo, and Vancouver. The cities encompass a range of smart city development on selected critical issues in economic prosperity (future digital economy, smart retail, smart tourism), social inclusion (digital inclusion, digital placemaking, smart health service, smart youth empowerment), and environmental sustainability (climate resilience action, circular economy, smart climate action).

Readership: Researchers, academics, students and policymakers interested in smart city development, urban planning and development.

Globalization

The City Rebooted

Networks, Connectivity and Place Identities in Singapore
edited by **Heng Chee Chan, Harvey Neo** (*Singapore University of Technology and Design, Singapore*)

Many cities across the world continue to grapple with long-standing urban challenges even as new ones emerge. With each crisis, cities address these perennial (e.g. decentralization of urban cores and revitalising the city centre), nascent, and emergent (work-life balance, digitization of social-economy) urban challenges with a greater sense of urgency. The book adopts a multidisciplinary approach to signpost future pathways of cities, drawing on the experiences of the city-state of Singapore.

Readership: Academics, students, industry professionals and general readers who have interest in cities and readers who work in the fields of urban science, urban studies and urban planning and policy.

Development of a Smart Tourism Destination

by **Genka Rafailova, Zlatka Todorova-Hamdan & Hristina Filipova** (*University of Economics – Varna, Bulgaria*)

- Presents a human-centric model for a smart and sustainable tourism destination
- Provides a methodology for evaluating and analyzing destinations as smart and sustainable
- Develops a framework for the development of a smart tourism destination that is easy to adapt for different destinations

Readership: Universities and colleges with courses in tourism, urban planning, and sustainable development; local governments; city libraries; agencies and organizations involved in tourism destination development, city branding and development, etc.

The Rise of the New Economic Powers and the Changing Global Landscape

by **Haico Ebbers** (*Nyenrode Business University, The Netherlands*)

This book explores the catching-up process of a group of large emerging markets: the New Economic Powers. This process is extremely robust and should be considered as the defining trend of our age, resulting in a pivotal change in world economics and politics. The outcome is that the West cannot dominate the world as it did in the previous 200 years. Today's world is pluralistic, and the larger emerging markets are becoming increasingly influential. That is the new reality, which at times caused, and will cause, further discomfort and uncertainty in the West.

Readership: University students and academics specialising in developmental economics, political economy, and international economics.

Policy Challenges of Globalisation in Sri Lanka

by **Sarath Rajapatirana**

This book provides a fresh look at the key challenges of policy formulation for a small country like Sri Lanka in a rapidly globalising world. It goes beyond economics to include history, politics, and ideology of different governments of the country overtime and extends its analysis to other countries facing similar challenges. The extent and speed of globalisation have been assessed through variables such as foreign direct investment, migration, trade openness, and the macroeconomic policies to take an even keel.

Readership: Students, policymakers and professionals interested in International Trade, International Economics, and Advanced Macroeconomics.

World Scientific Series in Global Health Economics and Public Policy - Vol 10

Public Policy Challenges in Rethinking Public Health

Comparative Perspectives

edited by **Katherine A Fierlbeck** (Dalhousie University, Canada)

This volume challenges current thinking on post-pandemic public health reform, which assumes that public health systems will naturally be strengthened in light of the shortcomings exposed by the COVID-19 pandemic. Instead, this volume asks why public health is such an intractable and difficult area for effective public policy initiatives and suggests two kinds of answers.

Readership: Graduate and undergraduate students studying public health, medicine, public administration, public policy, sociology, and health economics. Government official and policymakers engaging in public health.

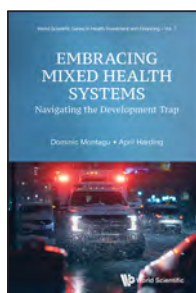

308pp	Oct 2024

Embracing Mixed Health Systems

Navigating the Development Trap

by **April L Harding** (Health Investment & Financing Corporation, USA), **Dominic Montagu** (University of California, San Francisco, USA)

- Takes a pragmatic approach to examining private sector engagement to advance public health policies and program goals
- Presents real-world examples that provide useful and unique guidance on how to do more than just measure the issue of private care provision

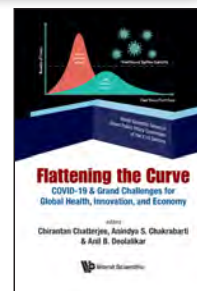

Readership: Policy makers, analysts, economists, and development specialists looking to improve health programs, policies, and systems in low- and middle-income countries.

History of Economic Thought / Economic History

A General History of China's Foreign Trade

Volume 1

by **Yuqin Sun** (*University of International Business and Economics, China*), **Xu Chang** (*Chinese Academy of Social Sciences, China*)
Translated by: **Rui Su, Robin Gilbank** (*Northwest University, China*)

- This book promotes the study of China's foreign trade system and provides an abundant empirical basis for international trade theory. It provides a reference for China's modern foreign trade and promotes the "One Belt And One Road" initiative in the new era
- Rich in content and full of historical materials and data, a valuable material for classroom teaching in economic history and foreign trade history

Readership: Professionals and general readers who are interested in the history of China's foreign trade.

Frontiers of Accounting and Financial History - Vol 4

Systems of Deceit

Financial Fraud and Scandal in the United Kingdom, 1700 – 2010

by **Steven Toms** (*University of Leeds, UK*)

- The book considers 300 years of British financial history through the unique lens of financial fraud
- The mix of history and finance will engage a generalist audience as well as financial practitioners, academics and students
- The book provides a historical explanation of a very contemporary problem
- Author uses a unique dataset of financial scandals

Readership: Students studying finance and financial history. Researchers working on financial frauds and crises. Financial practitioners, policymakers, government officials.

A History of China's Financial Thought

(In 2 Volumes)

by **Sui Yao** (*Central University of Finance and Economics, China*)

Translated by: **Yong Wang** (*University of Shanghai for Science and Technology, China*), **Zhongxiu Wu** (*Hanshan Normal University, China*)

This set presents the history and evolution of China's financial thought across its dynasties to the 20th century. Being the first work to cover both the ancient and modern ages, even going as far back as the Pre-Qin period, this comprehensive book fills in research gaps and provides the most thorough research into the history of China's financial thought, advancing the study of financial and economic history.

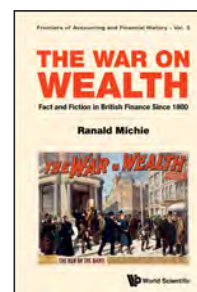

Readership: Readers who are interested in China's financial theorists, and readers with an interest in China's history and culture.

The War on Wealth

Fact and Fiction in British Finance Since 1800

by **Ranald Michie** (*Durham University, UK*)

This book addresses the divide that exists between the reality of finance and the image it projects. A functioning financial system is an essential feature of a modern economy, providing it with money, credit, capital, and investments. Conversely, those who provide this essential service are neither respected nor trusted. The causes and consequences of this divide is explored using the British experience from 1800 to the present, drawing upon a mixture of factual evidence and contemporary fiction. Nothing of this scale has been attempted before and this is the product of 50 years of research.

Readership: Professionals, General Audience interested in financial history.

The Great Depression

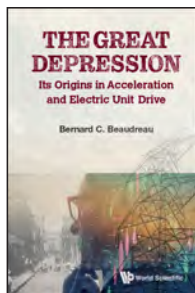

Its Origins in Acceleration and Electric Unit Drive

by **Bernard C Beaudreau** (*Université Laval, Canada*)

This book is part of a new generation of work on the events of the 1920s and 1930s, one that provides a gestalt view of this period. As such, the many events that have until now been viewed as unrelated, are viewed as parts of a greater whole, namely the introduction of a new power drive technology in the form of electric unit drive and its effects. The Roaring Twenties, the spectacular growth of the 1920s, the Smoot-Hawley Tariff Act, the Stock Market Boom and Crash, the decline in investment expenditure, the ensuing depression and the National Industrial Recovery Act are all shown to be related.

Readership: Academics, researchers; undergraduate and graduate students; general public, specifically those with an interest in economic history and history in general.

International Economics / Trade

Textbook

International Economics

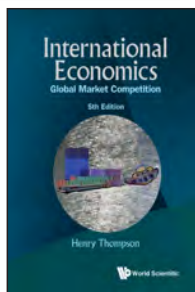

Global Market Competition (5th Edition)

by **Henry Thompson** (*Auburn University, USA*)

This text integrates trade theory and open economy macroeconomics with straightforward diagrams and numerous examples. The emphasis is on the gains from competitive trade and the limits of policy. Theoretical diagrams present the theory without assuming intermediate theory. Numerous problems for each section build confidence in applying the theory. Boxed examples illustrate the importance of theory.

Readership: Undergraduates in international economics.

Track to the Future

Investment, Finance and Lessons for the New Economy

by **Joseph Cherian** (*Asia School of Business, Malaysia & Cornell University, USA*)

This edited collection of Professor Joseph Cherian's past writings covers his translational research, observations, and hands-on practice from a unique career spanning both academia and the financial industry. Written in easy-to-understand layman's terms, this first edition comprises his contributions to areas of finance as wide-ranging as asset management, life-cycle savings and investing, infrastructure finance, digital currency, disruption and the economy, and macro, debt, sustainable and political economy.

Readership: Non-finance professionals, policy makers, regulators, finance practitioners, and academics interested in modern finance theory.

Islamic Economics & Finance

Mergers and Acquisitions in Islamic and Conventional Banks

Opportunities and Challenges
by **Nazim Ullah** (*International Islamic University Chittagong, Bangladesh*), **Fauzias Mat Nor, Junaidah Abu Seman, Nur Ainna Binti Ramli & Ahmad Fadly Nurullah Bin Rasedee** (*Universiti Sains Islam Malaysia, Malaysia*)

This book aims to provide details of mergers and acquisitions (M&A) in the banking sector, particularly with regards to Islamic and conventional banks. It analyses the different cases from theoretical and empirical perspectives, describing details of M&A strategy that work for corporate restructuring and elucidating how M&A strategy benefits different stakeholders.

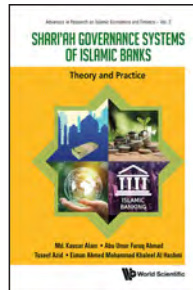

Readership: Academics, industry professionals and practitioners interested in the differences between the Islamic and conventional banking sectors.

Shari'ah Governance Systems of Islamic Banks

Theory and Practice

by **Md. Kausar Alam** (BRAC University, Bangladesh), **Abu Umar Faruq Ahmad** (Islamic Cooperative Finance Australia Limited, Australia), **Toseef Azid** (Qassim University, Saudi Arabia) & **Eiman Ahmed Mohammad Khaleel Al Hashmi** (Zayed University, UAE)

- This book presents the theory, practice, challenges, future policies, and key issues faced by the Shari'ah governance in the day-to-day practice of Islamic Financial Institutions (IFIs)
- This book reviews pluralistic approaches and identifies the best practice for developing a governance framework

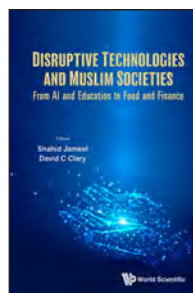

Readership: Financial experts, academics, post graduate students of Economics, Management and Accounting, researchers and practitioners in Shari'ah governance.

Disruptive Technologies and Muslim Societies

From AI and Education to Food and Finance

edited by **Shahid Jameel**, **David C Clary** (Oxford Centre for Islamic Studies, UK)

This edited volume brings together leading experts to explore the impact of disruptive technologies across a spectrum of Islamic countries and Muslim societies. Containing seventeen chapters covering artificial intelligence, science and technology, health and education, food systems, and finance, the collection offers a diverse array of perspectives.

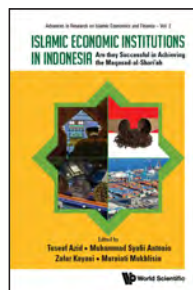

Readership: This book is suitable for those in academia and business, either based in or researching the modern Islamic World.

Islamic Economic Institutions in Indonesia

Are they Successful in Achieving the Maqasad-al-Shari'ah

edited by **Toseef Azid** (Qassim University, Saudi Arabia), **Muhammad Syafii Antonio** (Central Bank's Expert Committee Banking, Indonesia & National Shari'ah Council, Indonesia), **Zafar Kayani** (Trent University, Canada) & **Murniati Mukhlisin** (Rector STEI Tazkia, Indonesia)

- This is the First book on this issue to study practical implications of *Maqasad al-Shari'ah* and also different dimensions of *Maqasad al-Shari'ah* with the Islamic Economic Institutions of Indonesia
- Most papers presented in this book are based on original research focusing theory, practice, challenges, future policies, and key issues are presented simultaneously

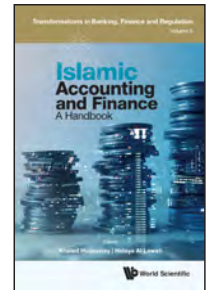

Readership: Undergraduate and Postgraduate students interested in Islamic Economics, Moral Studies, Development Economics, Sociology, Islamic Finance, Accounting and Anthropology Economics.

264pp	May 2023

Islamic Accounting and Finance

A Handbook

edited by **Khaled Hussainey** (University of Portsmouth, UK), **Hidaya Al Lawati** (Sultan Qaboos University, Oman)

- The book provides novel insights, presents applied understanding, advances theory, and empirical inquiry on Islamic accounting, finance and economics
- The book can be used as course material to postgraduate and undergraduate students in accounting, finance and economics

Readership: Undergraduate, graduate and postgraduate students studying in Islamic finance and corporate governance courses; academic libraries, practitioners and policymakers.

Macroeconomics / Microeconomics

Textbook

Price Theory and Applications

(10th Edition)

by **Steven E Landsburg** (University of Rochester, USA)

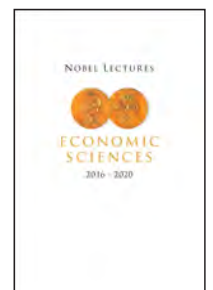

Price Theory and Applications challenges students to master the economic way of understanding the world, with equal emphasis on intuition and precise logic, and special emphasis on the interplay between them. The writing is inviting, humorous, and sometimes folksy, without sacrificing the insistence that arguments need to be airtight. Important concepts are introduced via entertaining examples and fleshed out with rigor.

Readership: Undergraduate students studying microeconomics or price theory.

Nobel Lectures in Economic Sciences (2016 – 2020)

edited by **Mats Persson** (Stockholm University, Sweden)

This volume is a collection of the Nobel lectures delivered by the Nobel laureates, together with their biographies and the presentation speeches, for the period 2016 – 2020.

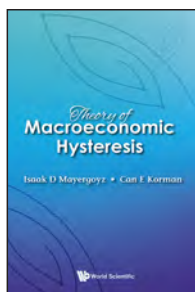

- (2016) **Oliver Hart** and **Bengt Holmström** “for their contributions to contract theory”
- (2017) **Richard H Thaler** “for his contributions to behavioural economics”
- (2018) **William D Nordhaus** “for integrating climate change into long-run macroeconomic analysis” and **Paul M Romer** “for integrating technological innovations into long-run macroeconomic analysis”
- (2019) **Abhijit Banerjee**, **Esther Duflo** and **Michael Kremer** “for their experimental approach to alleviating global poverty”
- (2020) **Paul R Milgrom** and **Robert B Wilson** “for improvements to auction theory and inventions of new auction formats”

Theory of Macroeconomic Hysteresis

by **Isaak D Mayergoyz** (University of Maryland, USA), **Can E Korman** (George Washington University, USA)

- Uses Preisach type hysteresis models to present the theory of macroeconomic hysteresis
- Adopts the theory of stochastic processes for the analysis of randomness of macroeconomic hysteresis caused by economic uncertainties
- To make the book accessible to readers, a strong emphasis has been placed on the clarity of exposition of various mathematical concepts related to hysteresis

Readership: Researchers and economists who are interested in economic hysteresis in general and macroeconomic hysteresis in particular.

World Scientific Lecture Notes in Economics and Policy - Vol 24

Lectures in Economy-Wide Microeconomics

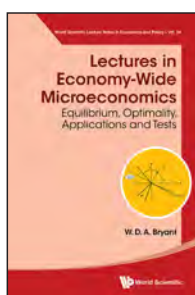

Equilibrium, Optimality, Applications and Tests

by **W D A Bryant** (Macquarie University, Australia & The University of Sydney, Australia)

Economics begins the task of designing welfare enhancing systems and policies by recognizing that people have personal interests that they aim to satisfy. This fact of life raises a basic question: *What are the economy-wide consequences of people pursuing their own interests?* Following an extensive and up-to-date study of the theoretical and empirical general equilibrium research that addresses this question, this book considers in depth, a number of pressing policy questions.

Readership: Advanced undergraduate and graduate students, researchers and practitioners in the fields of economics, econometrics and policy.

750pp	Dec 2024

The Vietnamese Economy and the Fourth Industrial Revolution

edited by **Dong Phong Nguyen, Dinh Thanh Su, Quang Hung Bui, Bich Nguyet Phan Thi, Viet Tien Ho, Nguyen Phong Nguyen & Xuan Vinh Vo** (University of Economics Ho Chi Minh City, Vietnam)

This book collects scholarship in topics such as marketing, behavioral economics, management, leadership, tourism, and law, by authors who are not only professors in the education industry, but also state officers holding governmental positions and managers of successful companies. This pool of expertise will provide readers with an objective and well-rounded overview of recent economic developments, risks, challenges and opportunities in Vietnam.

Readership: Advanced undergraduate and graduate students, researchers and practitioners in the fields of particle marketing, behavioral economics, management, leadership, tourism and law.

Economic Bifurcation and Chaos

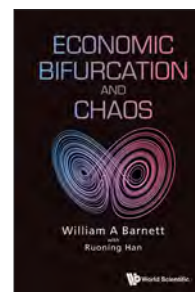

by **William A Barnett** (University of Kansas, USA) With: **Ruoning Han** (Whitman College, USA)

"The book analyzes how systems with many interacting parts behave as a whole. It gives an important warning against naive empirical macro modelling that ignores intrinsic instability in making its policy forecasts. It is a guide to understanding the deep structural features of modern economics and how to account for them in policy analysis. This research imposes a new level of rigor on the field of macroeconomics that serves to make it more credible."

James J Heckman
Nobel Laureate in Economics
University of Chicago, USA

Readership: Advanced undergraduate, researchers, and practitioners in the fields of economics and finance, as well as scientists interested in methodological developments and applications of nonlinear dynamics, bifurcation, and chaos in economics.

Agricultural Economics and Policy

by **David Zilberman** (University of California, Berkeley, USA), **Ruiqing Miao** (Auburn University, USA) & **Jian Rong** (Auburn University, USA)

This textbook is about modern agricultural economics and policy aimed at advanced degree students. It presents a comprehensive perspective on agricultural policy, its evolution, challenges, and limitations. The book includes numerous applications as well as six problem sets with selected solutions.

Readership: Academics, researchers, students, policymakers and professional interested in agricultural economics and environmental policy.

Household Sustainability

Nurturing a Greener, Fairer, and More Prosperous Future by **Sumit Agarwal** (National University of Singapore, Singapore), **Jian Zhang** (The University of Hong Kong, China) & **Xin Zou** (Hong Kong Baptist University, China)

This handbook is intended for researchers or anyone interested in academic research on household sustainability. It provides an overview of recent research findings in this field, covering three major topics: household environmental sustainability, social sustainability, and financial sustainability. Specific research studies and findings that have contributed to our understanding of household sustainability are also highlighted in this book.

Readership: Students, academics, policymakers, and anyone interested in improving their understanding of household sustainability and its impact on the environment and society.

Lectures on Dynamic Macroeconomics

Methods and Applications
by **Chetan Dave** (University of Alberta, Canada),
Marco M Sorge (University of Salerno, Italy)

Modern macroeconomic theory is the study of dynamic general equilibrium economic models. Models are defined broadly and allow for situations where markets do not always clear and where prices do not necessarily adjust instantaneously. This text provides an introduction to the study of such models: time can either be modelled in a discrete or continuous fashion, and the environment may be either deterministic or stochastic – this generality accommodates both business cycle and economic growth modelling.

Readership: Graduate and advanced undergraduate students in Macroeconomics; researchers and practitioners in the fields of Theoretical and Applied Macroeconomics and Computational Economics.

The Science of Mistakes

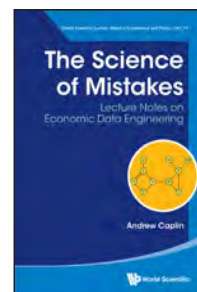

Lecture Notes on Economic Data Engineering
by **Andrew Caplin** (New York University, USA)

“This book offers the first systematic exposition of an exciting new line of research. It shows not only how rational choice theory can be generalized to allow for random errors in a flexible way, but how the costs of precision, and hence the structure of the error that should be expected in any given decision problem, can be backed out from behavioral data.”

Michael Woodford, Columbia University

Readership: For economists, psychologists, and data scientists interested in a common analytic framework for understanding mistakes.

Decoding Economic Crises

by **Cristina Peicuti**, **Jean-Marc Daniel** (ESCP Business School, France)

Decoding Economic Crises attempts to answer the question of whether American leadership has emerged unscathed from the damage inflicted by the 1975, 1992, 2009 and 2020 recessions and their legacies of debt. Looking forward to the future, there is a particular focus on environmental change. The book interrogates whether devastating crises might ensue, reminiscent of the ‘nutritional trap’ theorised by Nobel Prize winner Angus Deaton. Finally, *Decoding Economic Crises* asks if there will be a return to times of extreme scarcity as seen prior to the mid-18th century.

Readership: Undergraduate students in Economics, Business, Marketing, and Finance.

Household Financial Management

by **Sumit Agarwal** (National University of Singapore, Singapore), **Yeow Hwee Chua** (Nanyang Technological University, Singapore)

This book is dedicated to showcasing the importance of household financial management through the lens of academic research, with the goal of enhancing the financial well-being of individuals. Through an exploration of households’ financial choices over their lifecycle, the book aims to provide a comprehensive understanding of households’ financial decision-making processes, grounded in economic models, policies, and data.

Readership: Undergraduates, professionals and policy makers involving in household finance and personal finance.

Reviews in Modern Quantitative Finance

edited by **Andrey Itkin** (*New York University, USA*)

This volume contains six chapters which cover several modern topics of quantitative finance and reflect the most significant trends currently shaping this field. The chapters discuss in detail and make original contributions to stochastic/fractional volatility models and their asymptotic solutions (Chapter 1); equity trading, optimal portfolios and related problems (Chapters 2, 5, 6); machine learning and NLP (Chapters 2, 3); and economic scenario generation (Chapter 4), and are written by the leading experts in the field.

Readership: Undergraduates, graduates and researchers specializing in quantitative finance, and practitioners in the field.

Modern Trends in Financial Engineering - Vol 5
Multiscale Financial Data Analytics and Machine Learning
 by **Tim Leung** (*University of Washington, USA*),
Theodore Zhao (*Microsoft Research, USA*)

- Novel practical approach to financial time series analysis and applicable to machine learning, with detailed graphical and numerical illustrations
- New approach allows for financial data analytics with multiple (higher) resolutions, useful for equity, cryptocurrency, and other asset prices
- Step-by-step easy-to-follow algorithm, with pseudocodes, for readers to implement

Readership: Advanced undergraduate students, Master students, and PhD students in quantitative finance, econometrics, statistics, data science, and machine learning.

Peter Carr Gedenkschrift
 Research Advances in Mathematical Finance

edited by **Robert A Jarrow** (*Cornell University, USA*), **Dilip B Madan** (*University of Maryland, USA*)

The contributed papers cover a wide range of topics corresponding to the vast range of Peter's interests. Each paper represents new research results in recognition of Peter Carr's scholarly activities. The book serves as an important marker for the research knowledge existing at the time of the Gedenkschrift's publication on a number of topics within quantitative finance. It reflects the diverse interactions between mathematics and finance and illustrates, for those interested, the breadth and depth of this development.

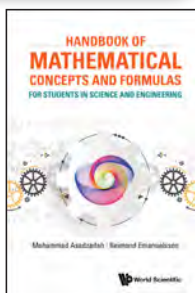

Readership: Undergraduates, graduates and researchers interested in the work of Peter Carr and specializing in the area of quantitative finance.

Fair Exchange

Theory and Practice of Digital Belongings
 by **Carlos Molina-Jimenez, Dann Toliver, Hazem Danny Nakib & Jon Crowcroft** (*University of Cambridge, UK*)

"The authors give a clear exposition of the key features of fair exchange protocols. They establish a framework for fair exchange and discuss different instantiations. They cover risks from both a technical perspective but also those that extend beyond the protocols including legal considerations. This is an important and interesting read for anybody with an interest in this vital component of the digital economy."

Chris Hankin, Imperial College London

Lectures on Probability and Statistics for Graduate-Level Economics

by **Antonio Jiménez-Martínez** (*Centro de Investigación y Docencia Económicas, Mexico*)

These notes provide an intuitive roadmap to navigate graduate-level courses in mathematical probability and statistics for economists. Each chapter presents questions prevalent on each topic and lays out the state-of-the-art theoretical frameworks used to address such questions. The book offers a diverse array of solved examples to help gain intuitions on abstract concepts, as well as unsolved exercises to stimulate the readers' training in such concepts. The book presents the theoretical side of probability and statistics in a rather concise way and stresses the importance of motivating examples and observations.

Nonlinear Trending Time Series

Theory and Practice

by **Li Chen** (*Xiamen University, China*), **Jiti Gao & Farshid Vahid** (*Monash University, Australia*)

This book offers an overview of recently developed trending time series models and introduces new nonlinear, nonparametric, and semiparametric methods. In particular, it proposes useful methods to solve the problem of endogeneity in the linear trending regression models when the trend component is either weak or strong. The book also proposes a testing procedure for common trends among trending time series and provides some illustrative examples for using these models and methods in economics, finance, and climate change. Serving as a practical toolbox, this book equips empirical analysts with essential tools to investigate trends in their work and research.

Computational Global Macro

Game Theory, Machine Learning and Causal Inference

by **Joseph Simonian** (*Autonomous Investment Technologies, USA*)

Computational Global Macro offers investors a new paradigm for the analysis of geopolitical risk. By drawing on game theory, reinforcement learning, and causal inference, the book provides investors with a novel framework for analyzing the political and economic interactions between global actors. In doing so it presents a counterpoint to the often informal and speculative approach to geopolitical analysis that is prevalent in the research produced by investment firms.

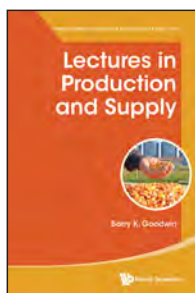

Readership: Students, researchers and investment professionals who are interested in applying sophisticated quantitative tools to their analysis of geopolitical and macro themes.

Lectures in Production and Supply

by **Barry K Goodwin** (*North Carolina State University, USA*)

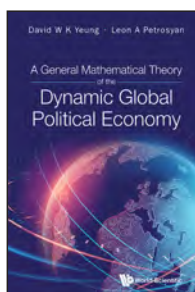

This book presents the core components of modern theories of production and market conditions from the supply side. Analysis under conditions of perfect information is initially considered to demonstrate key concepts in production. The focus is on applied empirical models of production within an economic context. Production under conditions of uncertainty and risk aversion is then considered in a comprehensive manner. Mechanisms for the management of production risk, particularly to insurance, are then developed in detail.

Readership: Students and instructors teaching production analysis at the graduate level.

A General Mathematical Theory of the Dynamic Global Political Economy

by **David W K Yeung** (*Saint Petersburg State University, Russia*) & **Hong Kong Shue Yan University, China**), **Leon A Petrosyan** (*Saint Petersburg State University, Russia*)

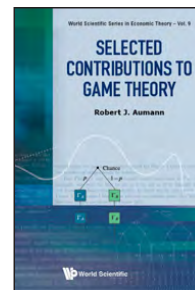

The book covers mathematical theory for different areas of the dynamic global political economy. In addition, it explicates the application of the mathematical theory in real-world scenarios, including (i) environmental degradation under an uncoordinated interaction scenario, (ii) global climate accords with collaboration and cooperation, (iii) trade network involving the Belt-Road Initiative (BRI) and Build Back Better World (B3W) Initiative, and (iv) random termination of international joint ventures.

Readership: Graduate students in Economics and Applied Mathematics; Researchers in economics; Academic scholars and university professors; Policy researchers.

World Scientific Series in Economic Theory Selected Contributions to Game Theory

by **Robert J Aumann** (*The Hebrew University, Israel*)

Robert Aumann was awarded (jointly with Thomas C Schelling) the 2005 Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel "for having enhanced our understanding of conflict and cooperation through game-theory analysis". This book contains ten of his most important contributions to game theory, as selected by Eric Maskin, also a Nobel laureate.

Readership: For researchers and students in the fields of economics and game theory.

Textbook

Statistics for Economists

by **Linus Yamane** (*Pitzer College, USA*)

This first course in statistics is designed for undergraduate students. This textbook focuses on deriving everything from first principles without using calculus or linear algebra. It is important for students to understand why they are doing what they are doing. Otherwise students cannot distinguish meaningless results from significant results. This textbook gets to the major points quickly and is thus relatively short and very accessible.

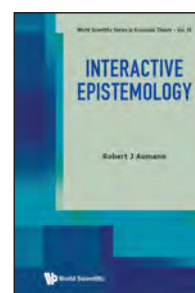

Readership: For undergraduate students who are doing Statistics.

World Scientific Series in Economic Theory - Vol 10

Interactive Epistemology

by **Robert J Aumann** (*The Hebrew University of Jerusalem, Israel*)

Robert J Aumann has received numerous prizes, including the Nobel Memorial Prize in Economic Sciences for 2005. With his 1976 paper, "Agreeing to Disagree", Robert Aumann pioneered the subject of interactive epistemology: the study of what people know, and what they know about what others know. Since then, the discipline has burgeoned enormously. This book documents Aumann's work leading to the 1976 paper and his subsequent contributions to the discipline. The scientific controversies emanating from his work are also included.

Stochastic Geometric Analysis with Applications

by **Ovidiu Calin** (*Eastern Michigan University, USA*)

This book is a comprehensive exploration of the interplay between Stochastic Analysis, Geometry, and Partial Differential Equations (PDEs). It aims to investigate the influence of geometry on diffusions induced by underlying structures, such as Riemannian or sub-Riemannian geometries, and examine the implications for solving problems in PDEs, mathematical finance, and related fields.

Readership: Advanced undergraduate and graduate students, researchers and practitioners in the fields of mathematics, physics, and engineering who are interested in the application of stochastic techniques in geometry and PDEs and how it relates to mathematical finance and electrical circuits.

World Scientific Series on Econometrics and Statistics - Vol 1 Spatial Econometrics

Spatial Autoregressive Models
by **Lung-Fei Lee** (*Ohio State University, USA & Shanghai University of Finance and Economics, China*)

This is the most recently developed book in Spatial Econometrics which cover important models and estimation methods. Its coverage is rather broad, and some of the topics covered have only been developed in the recent econometric literature in spatial econometrics.

Readership: For economic, regional science, public economics, trade policy and statistical readers, who are interested in spatial, regional or country policies and their economic impacts.

Textbook

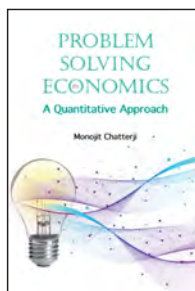

Problem Solving in Economics

A Quantitative Approach
by **Monojit Chatterji** (*University of Cambridge, UK*)

This book reinforces an understanding of Economics by showing how basic mathematics is used to construct models of the economy. By taking wide-ranging examples drawn for virtually all areas of economics, it shows how model-building is an indispensable aid to understanding economics. The mathematical techniques used in the book are fairly rudimentary — optimisation methods and equation-solving are the primary tools used.

Readership: Undergraduates and graduate students.

Game Theory

A Nontechnical Introduction to the Analysis of Strategy
(4th Edition)

by **Roger A McCain** (*Drexel University, USA*)

As with the previous editions, this fourth edition relies on teaching by example and the Karplus Learning Cycle to convey the ideas of game theory in a way that is approachable, intuitive, and interdisciplinary. Noncooperative equilibrium concepts such as Nash equilibrium, mixed strategy equilibria, and subgame perfect equilibrium are systematically introduced in the first half of the book. Bayesian Nash equilibrium is briefly introduced. The subsequent chapters discuss cooperative solutions with and without side payments, rationalizable strategies and correlated equilibria, and applications to elections, social mechanism design, and larger-scale games. New examples include panic buying, supply-chain shifts in the pandemic, and global warming.

Chaos, Complexity, and Nonlinear Economic Theory

by **Wei-Bin Zhang** (*Ritsumeikan Asia Pacific University, Japan*)

This book provides a comprehensive introduction to recent developments of complexity theory in economics. It presents different models based on well-accepted economic mechanisms such as the Solow model, Ramsey model, and Lucas model. It is focused on presenting complex behaviors, such as business cycles, aperiodic motion, bifurcations, catastrophes, chaos, and hidden attractors, in basic economic models with nonlinear behavior. It shows how complex nonlinear phenomena are identified from various economic mechanisms and theories.

Readership: Researchers and graduate students in economics and applied mathematics.

Application of Zakat

From Classical and Contemporary Perspective

by **M Kabir Hassan** (University of New Orleans, USA), **Magda Ismail Abdel Mohsin** (INCEIF University, Malaysia) & **Aishath Muneeza** (INCEIF University, Malaysia)

Zakat, being the third pillar of Islam, is an act of worship fulfilled by Muslims. In order to achieve efficiency in the administration of zakat, innovation and technology can be used even within the parameters of Sharia. The objective of this textbook is to provide the opportunity to learn the basics of zakat and its contemporary application by highlighting the innovative practices of zakat with issues and challenges.

Readership: Undergraduate students in Islamic Studies/Islamic Finance.

When Housing Markets Meet Shadow Banking

Bubbles, Mortgages, Securitization, and Fintech

by **Rose Neng Lai** (University of Macau, Macao S.A.R), **Robert A Van Order** (George Washington University, USA)

- This is the book that links shadow banking, securitization, and housing markets of the US and China. It is analytical, but not overly technical. It is a narrative, but not as detailed as a textbook, providing various angles for readers from different backgrounds, following the "dance" between mortgage and housing markets and shadow banking, along with comparisons across the largest economies in the world

The Chinese Financial System

Sino-centricity and Orchestrated Control
by **Dominique Jolly**

"The book discusses how the interdependence of legal, regulatory, fiscal, state enterprise, and financial sector reforms has limited the speed with which reforms can be pursued in any one area. Even in the best of circumstances, it is extremely challenging to instill profit-maximizing behavior in creditors and borrowers alike in a transition economy due to the scarcity of skilled bank and corporate managers."

International Banking

A Functional Approach

by **Suk-Joong Kim** (*The University of Sydney, Australia*)

This book provides a comprehensive and up-to-date examination of the functions that international banks perform and the environment under which they operate. The dynamic nature of the international banking environment requires researchers in the field to develop skills that allow them to i) understand the fundamentals of international banking and ii) effectively identify current challenges and opportunities. In this regard, this book helps to cultivate a deep understanding of modern international banking and finance.

Readership: Advanced students and researchers pursuing studies in international banking and finance.

Covid-19 New Normal

edited by **Linda Low** (*Singapore University of Social Sciences, Singapore*), **Yew Haur Lee** (*Singapore University of Social Sciences, Singapore*)

This book seeks to understand the New Normal in a post-Covid-19 world, amid the ongoing battle against the pandemic. With emerging variants like Omicron, it is likely that the fight against Covid-19 would be a protracted one. It is thus timely to review how we have coped since its first outbreak in December 2019 and what the future holds from the economic, political and health perspectives.

Readership: Undergraduate and graduate students as well as researchers focusing on the political, economic and health impacts of Covid-19 in China and ASEAN.

Navigating the New Political Economy in Southeast Asia

Perspectives from Japan, Taiwan and the Region

edited by **Alan Hao Yang** (*National Chengchi University, Taiwan*), **Masahiro Matsumura** (*St. Andrew University, Japan*)

This book provides readers with the toolbox for navigating the regional dynamics of political economy in Southeast Asia, with special focus on exploring the key factors determining the shifting dynamics. Organized in three parts, namely, geopolitical and security factors, alternative fields for regional cooperation, and the regional considerations of Southeast Asia, the chapters in the book feature key factors determining the political economy of the region. Written by authors hailing from varied backgrounds, this book is also a joint research effort on policy discussion and timely assessment of COVID-19 recovery plans in Southeast Asia.

A World Scientific Encyclopedia of Business Storytelling

Set 2: Methodologies and Big Data Analysis of Business Storytelling (A 5-Volume Set)

Volume 1: Business True Storytelling

Volume 2: Business Storytelling and Sustainability

Volume 3: Business Storytelling Communication

Volume 4: Business Storytelling, Science and Statistics

Volume 5: Business Storytelling and Grounding Methodology

Editor-in-chief: **David M Boje** (*Aalborg University, Denmark & New Mexico State University, USA*)

This set of multi-reference works is meant to be read together as the five volumes interlace one another like the laces of a shoe in the famous painting by Vincent van Gogh. Who will wear the shoes is a question long debated in art history and philosophy. If we take these five volumes from different points of view on the theory and practice of business storytelling then we have a crisscrossing, a new and impressive dialogue for the reader. This set is presented as a new way to lace up the laces of business storytelling.

Readership: Academics who work in the disciplines of Business, Management, and Organizational Communication.

JOURNALS: Subscribe / Recommend These Journals to Your LibraryFor a free institutional trial or subscribe to these journals, please contact us at marketing@feelbooks.in**Climate Change Economics (CCE)**www.worldscientific.com/cce**2023 CiteScore: 5.1****Editor-in-Chief:****Robert Mendelsohn** (*Yale University, USA*)

CCE publishes theoretical and empirical papers devoted to analyses of mitigation, adaptation, impacts, and other issues related to the policy and management of greenhouse gases. *CCE* is specifically devoted to papers in economics although it is understood that authors may need to rely on other fields for important insights.

**The Singapore Economic Review (SER)**www.worldscientific.com/ser**2023 Impact Factor: 1.5****Editor:****Euston Quah** (*Nanyang Technological University, Singapore*)

The *SER* is a general economics quarterly devoted to publishing the best policy and applied economics papers in addition to high-quality theoretical pieces. Widely regarded as a leading journal in the Asia-Pacific, it has a long history of publication on economic issues impinging on Southeast Asia and the broader Asia-Pacific region.

**Water Economics and Policy (WEP)**www.worldscientific.com/wep**2023 Impact Factor: 1.0****Editor-in-Chief:****Ariel Dinar** (*University of California, Riverside, USA*)

WEP will address the economic-policy interaction by publishing highly technical water economics research with clear relevance for policy. *WEP* will aim to target a wide range of economic questions at local, regional, national and international levels.

**Annals of Financial Economics (AFE)**www.worldscientific.com/afe**2023 CiteScore: 6.6****Editor-in-Chief:****Alan Wing-Keung Wong** (*Asia University, Taiwan; The Hang Seng University of Hong Kong; et al.*)

The *AFE* is an international journal with the goal of advancing the knowledge and understanding of the practice of financial economics through the publication of a high-quality and practitioner-relevant journal. This journal offers a specialized forum for applied research on investments in various financial markets, market microstructures, asset pricing and regulation of financial markets.

**Journal of Climate Action, Research, and Policy (JOCARP)**www.worldscientific.com/jocarp**Editor-in-Chief:****Jan W. Dash** (*Editor, World Scientific Encyclopedia of Climate Change*)

JOCARP's vision is a pioneering open access journal, with the unique focus of providing solid science-based and action-oriented resources catalyzing the implementation of more urgent, substantial, and pivotal climate action solutions by business of all types, government at all levels, academia, and non-governmental organizations (NGOs).

**Global Economy Journal (GEJ)**www.worldscientific.com/gej**2023 Impact Factor: 1.0****Managing Editor:****Joseph Pelzman** (*George Washington University, USA*)

The official peer-reviewed journal of the International Trade and Finance Association (IT&FA), *Global Economy Journal (GEJ)* is a well-established venue for peer-reviewed research on globalization and the institutions, laws, and agreements that structure the global economy, such as the WTO, the IMF, and the World Bank.

**Journal of Economics, Management and Religion (JEMAR)**www.worldscientific.com/jemar**Editor-in-Chief:****Nirvikar Singh** (*University of California - Santa Cruz, USA*)

JEMAR is the first academic journal specifically dedicated to exploring the Economics, Management and Religion nexus using state-of-the-art research methodologies.

**Journal of International Commerce, Economics and Policy (JICEP)**www.worldscientific.com/jicep**2023 Impact Factor: 1.3****Managing Editor:****Jie Li** (*Central University of Finance and Economics, China*)

JICEP is a peer-reviewed journal that seeks to publish high-quality research papers that explore important dimensions of the global economic system (including trade, finance, investment and labor flows).

International Journal of Theoretical and Applied Finance (IJTAF)

www.worldscientific.com/ijtaf

2023 Impact Factor: 0.5

Editors-in-Chief:

Matheus R Grasselli (*McMaster University, Canada*)

IJTAF brings together international experts involved in the mathematical modelling of financial instruments as well as the application of these models to global financial markets.

The Journal of FinTech (JFT)

www.worldscientific.com/jft

Co-Editors

Zvi Wiener (*Hebrew University of Jerusalem*)

David Lee (*Singapore University of Social Sciences*)

Blanka Horvath (*University of Oxford*)

The main emphasis of *The Journal of FinTech* is to provide a broad platform for research and discussion of issues related to this new era. The three basic components of FinTech are Financial Systems, Technologies and Applications.

The Quarterly Journal of Finance (QJF)

www.worldscientific.com/qjf

2023 Impact Factor: 0.9

Editors

David Feldman (*UNSW Sydney*)

Bernadette A. Minton (*Ohio State University*)

Fernando Zapatero (*Boston University*)

The *QJF* publishes high-quality papers in all areas of finance, including corporate finance, asset pricing, financial econometrics, international finance, macro-finance, behavioral finance, banking and financial intermediation, capital markets, risk management and insurance, derivatives, quantitative finance, corporate governance and compensation, investments and entrepreneurial finance.

International Journal of Financial Engineering (IJFE)

www.worldscientific.com/ijfe

2023 Impact Factor: 0.6

Editor-in-Chief:

George X. Yuan (*Sun Yat-Sen University, Guangzhou, China*)

IJFE will feature financial engineering papers which: demonstrate multidisciplinary interaction among the fundamental theoretical results of financial mathematics; link to practical issues of the financial industry; comment and encourage the implementation of new technical methods or solutions in the financial industry through the platform of financial engineering.

Review of Pacific Basin Financial Markets and Policies (RPBFMP)

www.worldscientific.com/rpbfmp

2023 Impact Factor: 0.3

Managing Editor:

Cheng-few Lee (*Rutgers University, USA*)

RPBFMP concentrates on global interdisciplinary research in finance, economics, accounting, and management. It particularly emphasizes the economic, financial, and management relationships among Pacific rim countries.

World Scientific Annual Review of Fintech (WSARFT)

www.worldscientific.com/wsarft

Editor-in-Chief:

David Lee Kuo Chuen (*Singapore University of Social Sciences*)

Associate Editors-in-Chief:

Daniel Liebau (*Erasmus University*)

Cindy Deng Xin (*Nanyang Technological University*)

The *World Scientific Annual Review of Fintech* aims to publish theoretical and empirical research of the highest quality across all major fields in fintech and sustainable development.

World Scientific Annual Review of Islamic Finance (WSARIF)

www.worldscientific.com/wsarif

Co-Editors

Belal Ehsan Baaquie (*Helixtap Technologies, Singapore*)

Mohamed Eskandar Shah Mohd Rasid (*Hamad Bin Khalifa University, Qatar*)

Saad Azmat (*Lahore University of Management Sciences, Pakistan*)

This journal aims to publish papers which contribute to the academic discipline of Islamic finance through impactful research and innovative solutions.

Journal of Financial Management, Markets and Institutions (JFMMI)

www.worldscientific.com/jfmml

2023 CiteScore: 1.3

Editor-in-Chief

Vincenzo Capizzi (*Università del Piemonte Orientale, Italy*)

The aim of the *JFMMI* is to publish high quality, original and rigorous research papers concerning broad areas of finance. Areas of interest include, but are not limited to: Financial Institutions, Financial Markets, Risk Management, Investments and Corporate Finance.

JOURNALS: Subscribe / Recommend These Journals to Your LibraryFor a free institutional trial or subscribe to these journals, please contact us at marketing@feelbooks.in**The International Journal of Accounting (TIJA)**www.worldscientific.com/tija**2023 Impact Factor: 2.0****Managing Editor:****A. Rashad Abdel-khalik** (*University of Illinois, Urbana-Champaign, USA*)

The aim of *TIJA* is to advance the academic and professional understanding of accounting theory, policies and practice from the international perspective and viewpoint. The Journal editorial recognizes that international accounting is influenced by a variety of forces. Thus, the primary criterion for manuscript evaluation is the incremental contribution to international accounting literature and the forces that impact the field.

**International Game Theory Review (IGTR)**www.worldscientific.com/igtr**2023 Impact Factor: 0.4****Editors****David W K Yeung** (*Hong Kong Shue Yan University*)
Leon A Petrosyan (*St. Petersburg State University*)

IGTR emphasizes rigorous analysis and will offer up-to-date insights and perspectives through original research in game theory and its applications. It will publish both original articles and state-of-the-art review articles and will seek to maintain a balanced orientation between game-theoretic modelling and practical implications.

**Economics Open**www.worldscientific.com/economics-open**Impact Factor: 0.9****Subject Editors****Ariel Dinar** (*University of California, Riverside*)
John Gibson (*University of Waikato*)
Almas Heshmati (*Jönköping University*)
Young Hoon Lee (*Sogang University*)
Jie Li (*Central University of Finance and Economics*)
Euston Quah (*Nanyang Technological University*)

Economics Open is a new fully peer-reviewed, open access, broad scope journal that publishes original research and review articles on all aspects of economics.

**Asian Development Review (ADR)**www.worldscientific.com/adr**2023 Impact Factor: 1.0****Editor-in-Chief****John Gibson** (*University of Waikato*)**Managing Editor****Donghyun Park** (*Asian Development Bank*)

The *ADR* is a professional journal that publishes research on development issues relevant to the Asia and Pacific region, specifically members of the Asian Development Bank.

**International Journal of Empirical Economics (IJEE)**www.worldscientific.com/ijee**Editor in Chief:****Young Hoon Lee** (*Sogang University, Korea*)
Almas Heshmati (*Jönköping University, Sweden*)

The *IJEE* is a peer-reviewed general interest economics journal aiming to contribute to empirical research in all fields of economics.

**Journal of Business and Economic Analysis (JBEA)**www.worldscientific.com/jbea**Editor in Chief:****Mohammad Nabil Almunawar** (*Universiti Brunei Darussalam*)

The *JBEA* is an international interdisciplinary journal dedicated to advancing existing knowledge and understanding in the fields of business, management, economics, accounting and finance.

**Journal of Urban Futures (JUF)**www.worldscientific.com/juf**Editors-in-Chief****Ursula Eicker** (*Concordia University, Quebec, Canada*)
Peter Marcotullio (*Hunter College, City University of New York, USA*)

The *Journal of Urban Futures* aims to encourage substantive research and generate knowledge for building sustainable urban futures, the backbone of a sustainable planet. It welcomes new knowledge about projecting, forecasting and backcasting urban sustainable development in individual cities and within urbanization processes.

**Journal of Extreme Events (JOEE)**www.worldscientific.com/joe**Managing Editors****William Solecki** (*Hunter College, City University of New York, USA*)**Joern Birkmann** (*Institute of Spatial and Regional Planning, University of Stuttgart, Germany*)

The objective of the *Journal of Extreme Events* is to provide a forum for analysis of the occurrence, impact, and significance of extreme events on natural and human systems.
