# Housing and Life Course Dynamics

## Changing Lives, Places and Inequalities

By Rory Coulter

Deepening inequalities and wider processes of demographic, economic and social change are altering how people across the Global North move between homes and neighbourhoods over the lifespan.

This book presents a life course framework for understanding how the changing dynamics of people's family, education, employment and health experiences are deeply intertwined with ongoing shifts in housing behaviour and residential pathways. Particular attention is paid to how these processes help to drive uneven patterns of population change within and across neighbourhoods and localities.

Integrating the latest research from multiple disciplines, the author shows how housing and life course dynamics are together reshaping 21st-century inequalities in ways that demand greater attention from scholars and public policy makers.

### Contents

1. Introduction
2. Housing: a life course perspective
3. Households and families
4. Learning and training
5. Employment and money
6. Health, well-being and care
7. Changing places
