# Military Strategy in the 21st Century

## The Challenge for NATO

‘A sobering and stimulating set of essays which remind us of the importance of military strategy and the difficulty of getting politicians to think strategically. The authors take aim at some dangerous misconceptions which, unless addressed, will continue to weaken the Western alliance.’ — Christopher Coker, Director of LSE IDEAS, and author of *The Improbable War: China, the United States and the Logic of Great Power Conflict*

This is the first volume to examine current military risks and threats for NATO from a military strategy vantage point. Which strategies are needed? Is ways—ends—means thinking possible as a strategic template today? The contributors probe the relative importance, utility and options of military strategy across NATO as it confronts a variety of challenges old and new, as hybrid threats, new nuclear risks and conventional force combine in complex ways. They also examine what military strategy and military integration really mean, when NATO’s multilateral framework is being weakened by degrees of self-interest. They analyse the USA’s political and military role in Europe, and assess military strategic responses to Russian aggression in Ukraine and the Middle East. Moreover, they study the role of member states’ military strategy set against Article 5 and non-Article 5 risks and threats, and explore how European states devise and implement military strategic options.

This book makes a clear assessment of political level strategy and its implications for military integration.

**Janne Haaland Matlary** is Professor of International Politics at the University of Oslo and the Norwegian Military Command and Staff College; she was formerly Norway’s deputy minister of foreign affairs. **Rob Johnson** is Director of The Changing Character of War Centre at the University of Oxford.
