

## Future? China!

How the New Superpower is Changing the West

By Frank Sieren

ISBN 9789811264672

Extent: 300pp, PB

Pub Date: 2023

Price: US\$28

Subject: Asian Studies

### ABOUT THE BOOK

“For centuries, it was taken for granted that the West determined the rules of the global game. In the 17th, 18th and 19th centuries, it was the Europeans. In the 20th century, it was the Americans. Now we find ourselves at the dawn of an epochal, worldwide transformation. For the first time, the global center of power is shifting towards Asia.”

— Frank Sieren

*Future? China!* is the first book that comprehensively examines the influence of a new superpower on all continents and aspects of life. The book explains how China is changing the western-dominated world order to a multi-polar world order — from the perspective of a European who has been living in China for almost three decades. The book argues that the times in which the West sets the standards are over. For the first time in centuries, an Asian country is assuming the position of being a world power. The Chinese are already questioning values that we consider to be universal.

China, the new superpower, already contributes to well over 30 percent of the global economic growth. The author believes China is only at the beginning of its ascent. He explains how the Middle Kingdom is expanding its influence throughout the world: whether in the automobile industry, which China is revolutionizing thanks to electric mobility and autonomous driving; or in the field of digitalization and artificial intelligence, where China is on a level-pegging with the USA; whether in Africa, where China has long since been investing in mineral deposits, infrastructure but also in light industry and creating trillions of jobs; or on the scale of the new Silk Road, a one trillion-dollar project, which reaches up to Duisburg and for which China has won the support of numerous Eastern European states.

## READERSHIP

General public interested in China's development and its impact on the West.

## CONTENTS

- About the Author
- Introduction
- China, Russia and Europe: Annoying Neighbors
- Artificial Intelligence and Other Future Technologies: Dramatic Digitalization
- The New Car: Autonomous Dissenters
- China's Reformers: Radical Retread
- Inventiveness: Intuitive Innovation
- The New Silk Road: Skillful Belt
- Asia's Crisis and China's Neighbors: Special Space
- China and the USA: Unrestrained Commercial Agents
- Africa: Alternative-Free Departure
- Outlook: The Century of Global Equality
- Afterword: The Constructive Compromise
- Acknowledgements
